

# **Dust Containment Systems**

## **HEAVY-DUTY VACUUM**

## **BDC-66**

The BDC-66, a six cartridge auto pulse dust collector, is preferred by professional contractors requiring continuous operation and high performance. It is designed for high productivity, easy dust handling and ease of maintenance.

The powerful motor and blower provide increased airflow and lift. The innovative silencer reduces noise and contains a slide gate to reduce vacuum when used with smaller equipment. The side access panel allows unfettered access to filters. Couple this with the new filter retaining system, and filter maintenance/changing is fast and easy.

The auto pulse cleaning system helps prolong filter life as the BDC-66 delivers a maximum airflow of 1294 cfm and static pressure of 20.5 inches. The BDC-66 has four dust handling options: 34 gallon dust bin, Longopac, 15 gallon and 32 gallon dust bag. With a state of the art design, heavy duty components and world class manufacturing, the BDC-66 is easy to maneuver, has a long service and provides a low operating cost.

#### **SPECIFICATIONS:**

Static Pressure: Maximum 20.5 in H<sub>2</sub>O Air Flow: 1294 cfm maximum Dust Bin Capacity: 34 gal Voltage: 230/460V 3ø, 60 Hz

Amperage: 63A

Power Cord: 50 ft. (15.24m)

Dust Hose Connection:

5 in. (127mm), 6 in. (150mm)

**Dimensions:** 

L 68 in. x W 30 in. x H 65 in. (1731mm x 757mm x 1643mm) Weight: Net 1014 lbs (460kg)

### **FEATURES AND BENEFITS:**

- Small and compact dust collector with standard dust bag for dust free working environment
- Standard silencer on top for low sound levels
- Automatic pulse jet cleaning system
- Large dust bin option of 150 liters with easy hand click system to remove the dust bin
- 63A 5 pole plug connection for use of all Blastrac machines
- Adjustable connection of 127mm and 150mm dust hose
- 1 ergonomic lifting point on top of the machine for easy transport
- All components are inside the body, so no risk of damage during work and transportation
- On-board air pistol for cleaning purposes
- Continuoiusly working even while changing the big bag
- Fan and compressor are able to be switched on and off separately, this enables more effective cleaning of the filters, withou having to run the fan unit

The Trusted Choice of Professionals for Over 30 Years

Always wear appropriate eye, ear and respiratory protection for the application, as specified by OSHA regulations and your employer. Never operate or maintain equipment before reading and understanding the instructions for operation and maintenance. Obey all safety signs and instructions while operating or maintaining equipment.
