

Diamabrush® is revolutionizing the professional and do-it-yourself flooring resurfacing industry.

Through years of research and development, the company has developed the most effective, easy-to-use diamond abrasive brushes and attachments used for coating removal, surface preparation, scarifying, honing, leveling and polishing. These products can be used across the entire spectrum of flooring applications including hardwood, concrete, vinyl composition, tile, terrazzo, and other stone surfaces. In addition to unsurpassed cutting performance, a significant benefit of Diamabrush® tools is their ability to be attached to any rotary driven machine. Whether used on a high speed, high pressure grinder, sander or planetary machine, or a low pressure, low speed automatic scrubber — Diamabrush® tools can transform any rotary machine into a diamond grinding powerhouse.

Mastic Removal Tool

Concrete Tool

Wood Sanding Tool

The Diamabrush® patented “Wearable Substrate” design performs coating removal and surface preparation for concrete, wood and stone floors in a one step process.

This full line of diamond abrasive metal attachments can be used for a wide variety of projects. The wood sanding tools can be used to remove hardwood coatings and varnishes, and sand a hardwood floor.

The concrete floor tools can abrade and profile, remove stubborn coatings (such as tile, glue and mastic), thin set, thin mil epoxies, urethanes and paint, as well as grind and prepare concrete for polishing.

Replaceable lathed “blade” concept, enables users to easily change used or worn down blades by simply adjusting two small allen screws, for continuous uptime and cost effective results.

Effective, easy-to-use diamond abrasive brushes and attachments for:

- Coating removal – including urethanes, varnishes, black mastic, thin set, glue and epoxy
- Surface preparation
- Scarifying

Honing, leveling and polishing Diamabrush® products can be used across the entire spectrum of flooring applications including:

- Hardwood
- Concrete
- Terrazzo and other stone finishes
- Vinyl Composition Tile

Diamabrush® tools can be used on any rotary driven machine including:

- Planetary Sanders
- Planetary Grinders
- Buffers and Polishers
- Automatic Scrubbers

Mastercraft

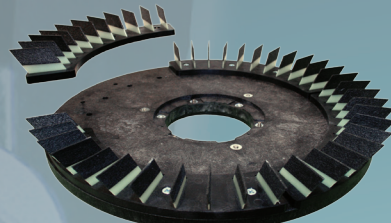

Polishing System Tool for Auto Scrubbers with Removable Blade System

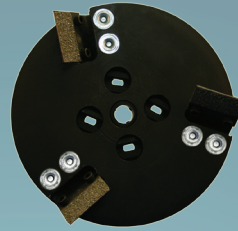

The Diamabrush® Polishing System is the most significant innovation in brush technology in the last 50 years. A multiple step, do-it-yourself polishing system, the DPS will provide users the ability to generate a polished, granite-like surface through every day cleaning on low powered, low pressure automatic scrubbers.

It's patented design enables users the ability to level, hone, clean and polish concrete, vinyl composition tile, terrazzo and other stone surfaces to a beautiful finish with superior reflectivity and shine.
