- ABRASIVE MATERIAL CLEANUP
- FINE, SUB-MICRON PARTICLES
- RAILROAD CONSTRUCTION
- SHIPYARD MAINTENANCE

**Gas and
Propane Powered!**

Ruwac

We vacuum everything.
www.ruwac.com

NO POWER? NO PROBLEM!

Unlike most vacuum systems, Ruwac's GV and PV Series are completely independent of power cords, airlines and electricity. Instead, these alternative power vacuums operate off a gas or propane power source with maximum versatility in mind. Combined with a 12 V electric start, heavy-duty casters, a rugged, ergonomic fiberglass frame and full handle bar, Ruwac has made it possible for you to take this vacuum virtually anywhere!

DURABILITY

Featuring heavy duty casters and an ergonomic frame, our GV and PV Series' offer complete portability. A sturdy base and full handle bar provide easy mobility over rough terrain and to remote locations without the worries of tipping. Once on the field, you can rely on these vacuums' fiberglass-reinforced housing to be lightweight, dent-free and durable, back by Ruwac's lifetime guarantee!

FILTRATION

If you're working with fine dust or powders, you need filtration you can depend on. Each of our gas-powered vacuums is equipped with an oversized, state-of-the-art MicroClean filter that's 99.9% efficient at .5 micron. Our industry-leading MicroClean filtration technology increases productivity by allowing longer vacuum cycles and less filter maintenance. For applications that require absolute filtration, we also offer extra large, DOP tested and certified HEPA filtration assemblies, that are 99.99% efficient at .3 micron.

EASY, DUST-FREE EMPTYING

At Ruwac, we understand that functionality is key. That's why our vacuums offer a filter shaker assembly and a foot-actuated drop down dustpan for easy cleaning. Just shake, step, pull and empty. Regular cleaning practices allow for prolonged filter longevity and improved vacuum performance.

Removable dustpan is foot-actuated, making disposal easy and dust-free

MicroClean filtration and manual external shaker system allow longer vacuum cycles and less maintenance

Ruwac's multi-stage filtration produces clean air with less maintenance

Alternative power vacuuming that combines performance with flexibility.
