

Made in America Since 1968

We've added headlights to our ride-on scrapers

5000, 5625, 5700, 7700, 8000

In an effort to continually improve our machines and deliver the products our customers are asking for, we have made improvements to several of our Ride-on Scrapers.

- We are now shipping all variants of the following models of Ride-on Scrapers with a headlight
 - 5000, 5625, 5700, 7700, 8000
- This powerful, 12Volt, LED light increases visibility and safety on the jobsite.
- *Due to the large number of frame and body styles National has produced, this feature is not available as a retro-fit kit for older machines or other models.*
- For repair purposes a kit is available
 - Part #404035 contains the housing, light and fasteners for changing the bulb and re-mounting the housing.
